E take pleasure in presenting to you our 37th Annual Catalog with the assurance that we will do all within our power to merit the continuance of your loyal patronage and confidence. Our success in maintaining quality and service is evidenced by the fact that we hold our customers, many of them, over a third of a century, and we seek new friends upon the same and single basis of reliability in merchandise and in methods. Our stock of plants is clean, healthy, vigorous, and true to name.

Visitors are always welcome; our greenhouses are open to the public.

Have You a Flower Garden?

Nothing is so inspiring, repaying you so richly, for such little expense, as your flower garden. It is as fascinating to the children as to the grown-ups, intriguing your interest and fancy, and providing a constant source of pleasure and loveliness. As all the world loves a lover, so all the world loves a flower. Flowers have a place in our lives which nothing else can fill. Every month in the year they rise up among us in a new dress, calling forth our admiration, love and praise. They are the pride of the rich and the joy of the poor. To work among them is to make one forget unpleasant things.

"To live 'mongst lush and growing things
Is like to give the spirit wings."

Who works 'mongst roses soon will find
Their fragrance budding in his mind."

Wherever you find a home worthy of the name, you will find flowers growing somewhere around it.

Roses Our Specialty

We have roses for every garden—old fashioned and right up to the latest and best varieties. Grown in 2½ and 4-inch pots, they will bloom profusely the first year. You will note the sensational "Jackson Set of 12 Everblooming Roses." It includes many of the best varieties, and if you really don't know roses we urge you to try this set. One trial will make you a lover of Roses.

Chrysanthemums

Our "Mum" list is a wonderful collection of the best in America. We ship you plants that will grow and be prize winners. We grow thousands of these beautiful flowers for the trade. Our Mums are known all over the country.

Each year the demand for chrysanthemums and dahlias grows greater and more exacting and each year finds us making greater efforts to meet this demand with only the most perfect stock.

Dahlias

These beautiful flowers are each year becoming more popular. The craze for size alone has about run out. A dahlia now must have more than size to commend it. Of course we all like to exhibit a flower larger than ever before shown, but, nothing can take the place of those brilliantly colored beauties, or those exquisitely formed, delicately tinted flowers, that lend themselves most admirably to all kinds of decorations—for perfect taste runs to the beautiful and artistic, rather than to the bizarre.

Wedding Bouquets, Corsages and Floral Designs

This work is done by an experienced designer, and we guarantee it to be the best possible, both in quality of flowers and make-up. Great care is exercised in packing. We ship flowers to all points in the country. See page 29.

Service

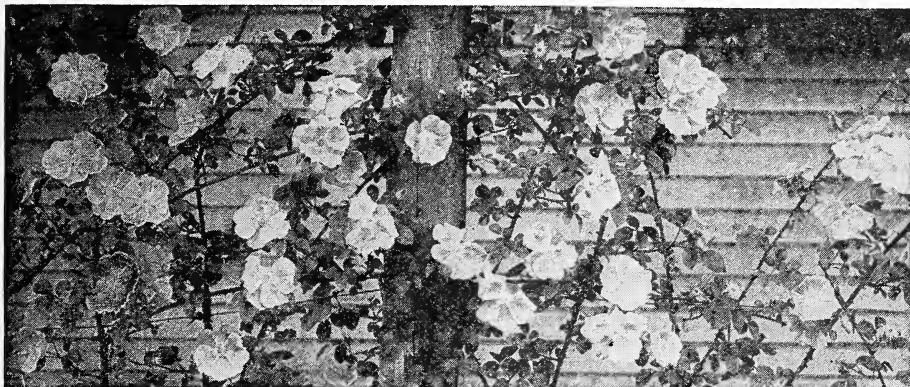

We take a personal interest in every order that is sent out. In all that we do, we consider the interests of our customers first and we want you to know that we are here to serve you and never consider a transaction complete until you are pleased.

It is always a pleasure to hear from our customers. If you have been successful with our plants, it is encouraging to know it. If you have cause to be dissatisfied, give us the opportunity, and we will adjust the trouble.

We thank you for past favors and courtesies and beg to remind you again that our ambition is to please you.

Terms of Sale

Silver Moon Climbing Rose

ORDER EARLY—Our aim is to execute all orders upon receipt, but during the rush season in the spring, delays are sometimes unavoidable, which can be partly overcome by our patrons anticipating their wants and ordering early. We give every order, no matter how large or small, prompt and careful attention.

GUARANTEE—We guarantee our goods to reach their destination in good condition, satisfactory to you, or they will be duplicated or money refunded. We are very careful to keep each variety true to name as labeled, and are ready at any time to replace, on proper proof, any that may prove otherwise.

NON-WARRANTY—Most failures with plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather or soil conditions, too deep or too shallow planting, etc., which renders it impossible for us to guarantee success and although we take all possible care to supply only such goods as will, under proper conditions, produce satisfactory results, we can give no warranty as to productiveness of any of the plants or bulbs we send out. It must, however, be plain to everyone who gives the matter the slightest thought, that it is to our best interest to send out only such stock as will reach perfection.

PLEASE NOTE—It is not unusual for us to receive orders without any signature or identification mark attached—if you do not get a response to your order within a reasonable time, please write again enclosing copy of letter or order so we may be able to trace same quickly.

Please keep copies of all your orders for comparison.

Please send cash with the order sufficient to cover the whole bill. No C. O. D. orders accepted unless remittance be made on account to guarantee acceptance. Coin should not be sent by mail. 10 cents extra on all orders less than \$1.00, unless postage is included for soil on roots.

ERRORS—We exercise the utmost care in filling orders, striving to do a little more than we offer; yet in the press of business, errors sometimes occur. In such a case, please notify us at once, and correction will be promptly and cheerfully made.

MAIL—If we prepay postage on plants shipped via mail we remove the dirt; the roots are wrapped in damp moss, then placed in a heavy paper tube; this is a very satisfactory way to ship but they take a little time to recover, as they must be potted in fresh soil and handled with care for a few days. If you wish soil left on the roots, include postage at the rate of 15 cents per dozen plants. In this way small orders will reach you with roots undisturbed.

EXPRESS—This is the ideal way to ship plants as we give you a perfect ball of soil on every plant, the roots are undisturbed and they start growing from the first. Under the new ruling they go at special rates making the cost very reasonable.

QUALITY—The many kind letters we receive every year complimenting us on the stock sent out are evidence enough that the quality of our goods cannot be surpassed.

Roses

No flower is so universally popular as the Rose, the "Queen of Flowers." It is everywhere wanted and always admired.

The demand for roses is increasing every year, and I feel justified in stating that my collection is unsurpassed.

DIRECTIONS FOR PLANTING

Roses will grow in any ordinary fertile ground, but they are particularly fond of a heavy soil, liberally enriched and well cultivated. The ground should be well spaded and pulverized to the depth of a foot or more, and enriched by digging in a good coat of any well-decayed manure. When the ground is thoroughly prepared, fine and in nice condition, put in the plant slightly deeper than it was before, and cover it with fine earth, taking care to draw it closely around the stems and pack firmly. It is important that the earth be tightly pressed on roots; water immediately after planting, so as to settle the soil, and if hot or windy, it may be well to shade for a few days. The ground should not be allowed to bake or become hard, but should be stirred frequently with hoe and rake so as to keep light and mellow, as well as free it from weeds and grass. The proper time to prune is early in the spring before growth has commenced; no exact time can be given, as that depends on the locality. The Hybrids must be cut back severely. They bloom best on strong new wood. In pruning the everblooming Roses all winter killed branches should be removed, also the wood which has become exhausted after several years' blooming, and younger shoots should be allowed to take their place.

Columbia

Cream of the New Roses

We here offer what is good in the new Tea and Hybrid Tea Roses. To have what is good you must try these Roses. They are the best that England, France, Luxembourg, Germany, Italy, Ireland, Holland and America can produce.

All Nice, Strong, Well-Rooted Plants, from 2½-inch and 4-inch pots.

ALEXANDER HILL GRAY—Deep lemon-yellow which intensifies as the blooms develop. A perfectly formed flower with a high-pointed center. 25c; 2 years, 50c.

Mr. J. E. Jackson, Gainesville, Ga.

My Dear Sir: I again want to express my appreciation for the wonderful roses I ordered from you last spring. When I tell people at this time that those rose bushes were but 8 months old when I got them from you and they only cost me \$1.00 a dozen, I think they have put me in a class with Ananias. Those little bushes produced some mighty pretty blooms last fall and I am looking forward to some beauties this year. I do not know just why I did not order chrysanthemums earlier this spring but the fact remains I did not. If you still have a supply on hand kindly reserve for me \$5.00 worth of the 15 for \$1.00 class. I will leave, of course, the color, etc., to you, but I will appreciate if you can supply me with those which bloom early, as the frost gets our stuff before it hits Gainesville. Please advise by return mail if you have these mums on hand and I will send money order for the \$5.00.

You will recall that I sent you a list of names last year with the request that you furnish catalogues. I have seen some of these people and those who ordered are more than satisfied.

Yours very truly,

F. W. W.

Chrysanthemums

How An Amateur May Grow Chrysanthemums

It is a mistake to set out plants too early. The results at blooming time are great tall plants, inclined to be spindling and not of that sturdy, stocky nature which invariably produce the better blooms. Besides you have worked a month or more at your plants which is wholly unnecessary.

The first important step in growing potted Chrysanthemums is the proper preparation of the soil. One-third manure and two-thirds sod stacked together and rotted (must be thoroughly rotted), and run through a coarse sieve is best. To one bushel of this soil add a double handful of pure "bone-meal," one handful of lime and one of wood ashes, and you are ready for potting. Drainage is of utmost importance, for without it the surplus water will sour the soil, the root will decay, and all your labor will have been in vain. From April 18 to June 25, according to the locality, get good, healthy plants from some reliable florist and repot them at once in $3\frac{1}{2}$ or 4-inch pots, and when the pots are filled with roots, repot into 6-inch pots, and from these when filled with roots, into 9 or 10-inch pots.

In making the final shift, leave $1\frac{1}{2}$ or 2 inches of space at the top of the pot to receive water, and later on, when the buds appear, this space can be filled with manure to act as a stimulant. Immediately after the last potting, plunge your pots in the ground up to the rim, place your pots in rows 2 feet apart by 1 foot, and water only when it is needed. Never allow the soil to become dry enough to wilt the plant. With a soft cord fasten the plant to a small neat cane-stake plunged deep enough to make steady, and if the branches are inclined to fall over, tie around the plant a cord which will act as a hoop and keep it in shape.

If a bushy plant is desired, when the plant is about 6 inches high, pinch out the top, this will cause other branches to appear, and when these branches are 4 or 5 inches long, pinch the top out, and so on until July 15, when you must give the final pinching. At this season you can

begin to feed your plants with manure water, made by putting a shovelful of cow manure into a half-barrel of water. Give this once a week until the buds begin to form; then you can increase to twice a week. As the buds begin to swell, give it three times a week until the buds begin to show color; then give it once a week and as the buds begin to unfold withhold all stimulants. It should be said that soot water is good, given, say, once in two weeks in place of manure water.

Now to grow fine flowers on long stems, you must watch the plant, and as soon as the buds are large enough you must remove all as fast as they appear, except the largest and strongest bud on the end of each branch; also remove all growth that appears at the junction of the leaves, and fine, large flowers will be your reward. Disbudding should be done as soon as the buds are of sufficient size to do the work without injuring the one retained, and should be confined to the early hours of the day as far as possible, at which time the growth is more brittle and easily removed with the thumb and finger.

As to the plants grown in the open ground, it is best not to have it too rich; prepare as you would for your vegetable garden. In case you have some plants that have stood over winter and which come up in clumps, you must take them up and plant them, only one sprout in a place.

Let me tell you how I grow some of my finest blooms: I prepare the ground as above stated, and then plant in rows $2\frac{1}{2}$ feet apart and 6 or 8 inches apart in the rows, and train plants to one flower each. Place stakes $1\frac{1}{2}$ inch thick and 4 feet high, 17 feet apart in the rows, and fasten to these stakes by giving a cord one turn around each stake. Three cords, 12 inches apart will be necessary, the first one 12 inches from the ground. Stretch them from one end of the row to the other, and tie the plants to these cords as fast as they grow up to them. Keep up a high state of cultivation, and water if

needed during dry, hot weather. When the buds appear take all off except one to each plant as fast as they appear, following directions for disbudding as given above. At this time give them manure water same as used for pot plants, about every ten days until they show color, then leave off the manure water, and use soft water. Watch for insects closely and at the first indication of them spray with tobacco tea to prevent them getting a strong foothold.

Peonies

Fertilize with thoroly rotted cattle manure, thoroly mixed and spaded into the soil 2 feet below the surface. Then in the top foot of soil, mix liberal quantity of bone meal. Having thus prepared your bed, plant the divisions so the eyes will be 2 or 3 inches below the level of soil. Keep them well cultivated which will do more good than further frequent fertilizing. If these directions are carried out the result will be most satisfactory. Plant during Fall and early Spring.

J. E. Jackson, Gainesville, Ga.

Dear Sir: I ordered some Dahlia plants from you last year for myself and friends. Of those ordered for myself I grew only four and Patrick O'Mara and George Walters were a show to everyone. People came in bunches to see them. I had over 100 blooms on the George Walters within 18 days. I put a temporary cover over them and budded and disbudded them for long stems and they were all as large as saucers and larger. I am ordering 13 more to be sent at once and hope I will be as well pleased as I was last year.

Yours very truly, MRS. E. S. L.

Beefsteak Begonia

Begonia Ione

Begonias—Flowering Varieties

ARGENTA GUTTATA—An elegant begonia. Rich green leaves, spotted with silver; produces white flowers in bunches, on ends of growth stems; very handsome. 10c and 25c.

BEGONIA, IONE—This beautiful little gem originated with me, and attracts more attention than anything in my houses on account of its beautiful compact form and pretty blooms. The foliage is a glossy-green, touched with orange, flowers pink—an entirely new shade of begonia. A true everbloomer, being entirely covered with blooms all the year. 15c, 25c and 50c.

CORALLINA LUCERNA—Immense trusses of bronzy red flowers. Blooms almost continually. This is the choicest of the flowering type. 25c and 50c.

GLORIE DE CHATELAINE—There is no equal to it as an outdoor bedder; very prolific bloomer. It is continually covered with large rosypink flowers, a good substitute for Cincinnati as a Xmas pot plant. 15c and 25c.

GRACILIS LUMINOSA—As the name implies, it is one of the most symmetrical and yet graceful plants we have ever known; very strong and robust, but still keeping its shape so as to make a very attractive winter house plant. Its foliage is rich glossy green, often shaded deep bronze. The flowers, when first opening, are bright cherry, changing to a clear coral red. 10c and 25c.

MANICATA—Large smooth, bright green leaves, hairy on stem and under side of leaf; large panicles of pink flowers high above the foliage; a strong grower and one of the best of recent introductions. 10c and 25c.

RICHARDSONII—Flowers white, foliage finely cut. 10c and 25c.

THURSTONII—A beautiful stately plant with remarkably handsome glossy foliage. The under side of the leaves is a rich purplish red, the veinings very prominent, while the face or upper side is a bronzy-green, shaded with crimson and olive, with a peculiar glossy metallic luster over all. Flowers rosy-white, in large clusters well above the foliage. 10c and 25c.

MAPLE BEGONIA—The old original kind with pink flowers. 15c, 25c and 50c.

METALLICA—A fine erect-growing Begonia, with dark, rough leaves. The surface is a lustrous bronze-green with a metallic hue; flowers pure waxy-flesh. 10c and 25c.

MME. DE LESSEPS—A decided improvement on B. Argenta Guttata, the leaf being four times the size seen in that variety, while the silky texture is the same. It is beautifully spotted with silver. A very strong, free-growing variety; will succeed with ordinary care. 10c and 25c.

NITIDA ALBA—A strong growing, profuse blooming variety, producing immense panicles of pure white flowers, standing well above the foliage. 10c and 25c.

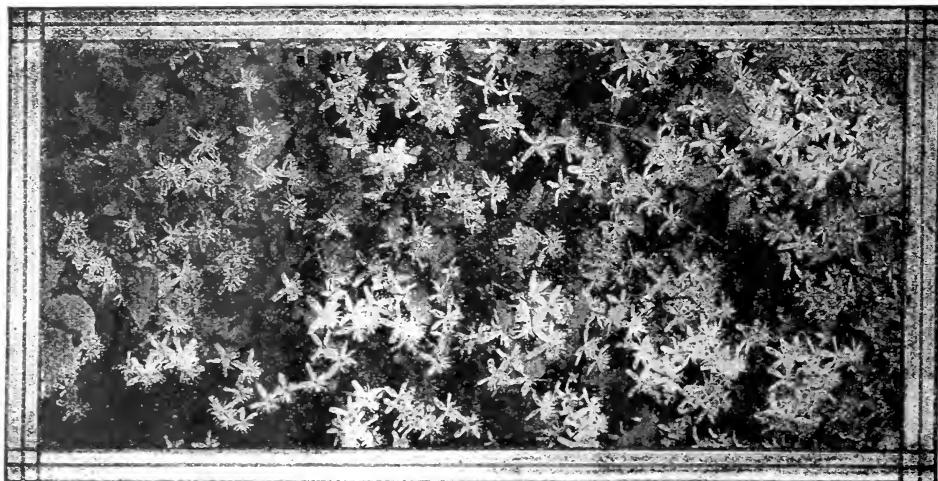

OTTO HACKER—In a class by itself. A strong vigorous grower, of fine upright habit, with large shining deep green leaves eight to ten inches long. Flowers bright coral red, borne in immense clusters eight to ten inches across. 25c and 50c.

PRESIDENT CARNOT—A strong growing variety of stiff, upright habit; foliage large, somewhat in style of B. Rubra, but more than twice as large; upper side deep green, under side purplish red; flowers beautiful coral red, in pendant panicles. 10c, 25c and 50c.

Due to extreme carelessness and delay in the Parcel Post system, we can recommend shipping only small orders by mail. See "Mail," page 1.

CHATELAINE SUPREME—A flowered pink, free branching, and always in bloom. Grand pot plant that will thrive under ordinary dwelling room treatment. 25c and 50c.

In design work and cut flowers we are better than ever prepared to care for your wants. We carry on hand a large stock of seasonable cut flowers. We ship only the finest, freshest flowers. Frequently, persons are undecided what to order and at such times you may leave the selection to us, stating what you wish to use them for and the price you wish to pay.

HOW TO ORDER. Give us as much time as possible. Do not be afraid to order even a week or two ahead. Then you are sure of getting just what you want.

Please notice that orders for early morning shipment must be in the night before. Our postoffice closes at 7 p. m.

When time is limited, always order by telephone or telegraph. Don't trust the mails, trains are often late and we often do not receive orders on time. If order by mail is for immediate shipment, please affix a special delivery stamp.

HOW WE SHIP. All cut flowers, designs, corsages and bouquets, packed to carry long distance safely, either winter or summer.

TERMS. All cut flowers and design work strictly cash.

RESPONSIBILITY. While we exercise the greatest care to have all flowers reach their destination on time, and will not ship unless we are reasonably sure they will reach you on time, we cannot be responsible for delays in trains, wrecks, or express agents' negligence. Should your flowers reach you too late, accept them under protest, do the best you can with them. If for a funeral, lay them on the grave, we will share the loss with you and take care of any claim against express company.
